Admission to Graduate Study

Graduate Management Admission Test (GMAT)
Applicants for graduate study in the College … on the GMAT may be waived if:

- an applicant has already earned a graduate degree from an accredited institution;
- an applicant to the Global M.B.A. format or to the M.S. in Digital Marketing program who is an NIU University Honors graduate with a B.S. or B.A. in a STEM-related field;
- an applicant to the M.S.T. program presents satisfactory scores on the LSAT or provides evidence of passing all parts of the C.P.A. examination;

Master of Business Administration

Admission
Admission to the M.B.A. program … … M.B.A. Programs at (866) 648-6221 for details.
NIU University Honors students who graduate with a B.A. or B.S. in a STEM-related field are guaranteed admission into the Global M.B.A. format as space permits. These students are exempt from the GMAT requirement.

Credit Requirements

Department of Accountancy

New courses

CIP: 52.03

676. DATA ANALYTICS AND DECISION MAKING IN TAXATION (3). Examination of the use of data analysis as both an investigative tool and a graphic medium for communicating business information. Challenges students to build their data and analytic competency to become less reactive and more proactive so they can embrace change, operate with ambiguity, and pursue creative techniques to communicate complex information within and beyond the tax department. Focuses on ensuring the quality of data and its impact on strategic decision. PRQ: A grade of C or better in ACCY 644 or consent of the department.

677. ADVANCED DATA ANALYTICS AND DECISION MAKING IN TAXATION (3). Advanced examination of the use of technology to identify and solve tax problems for the firm. Relies heavily on the use of communication skills and decision making to propose unique and innovative solutions that require the manipulation of large amounts of data. Focuses on effective communication of actionable tax and business strategies for organizations. PRQ: A grade of C or better in ACCY 676 or consent of the department.

Course revisions

644. ADVANCED TAXATION (3). Study of the federal income taxation of business entities. Emphasis on corporations, partnerships and S corporations and includes an introduction to tax research property transactions. A student may receive credit for only one of the following: ACCY 450, ACCY 456, ACCY 550, ACCY 556, ACCY 644, or ACCY 650. Not available for credit in the M.A.S. in taxation track. Not available for Phase II credit in the MAS program. A student must earn a grade of C or better in an income tax concepts course intermediate financial reporting II course prior to enrollment.

645. PROFESSIONAL TAX RESEARCH (3). Study of the legal–various tax authorities. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. CRQ: A grade of C or better in ACCY 644 or consent of the department.

646. TAX PRACTICE AND PROCEDURE (3). Study of the structure, … representation of taxpayers. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A
647. CORPORATE TAXATION (3). Study of federal tax concepts following: ACCY 456, ACCY 556, ACCY 644, ACCY 647, ACCY 650. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

649. PARTNERSHIP TAXATION, TAXATION OF FLOW-THROUGH ENTITIES (3). Study of the federal income taxation of partnerships and S-corporations, with emphasis on the tax laws related to the formations, operations, allocations, distributions, liquidations, and sales/exchanges of partnership and S-corporation interests. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

651. FEDERAL ESTATE AND GIFT TAXATION (3). Study of the federal income taxation of estates and gifts to succeeding generations. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

652. TAXATION OF ESTATES AND TRUSTS (3). Study of federal income, estate, and gift taxes. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

653. ACCOUNTING FOR INCOME TAXES (3). Study of the income tax accounting and reporting. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

654. SPECIAL TAX TOPICS (1-3). Study of selected tax topics during a single semester. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

656. TAX CONCEPTS AND PROPERTY TRANSACTIONS (3). Study of timing and measurement of income and expense. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

657. TAXATION OF COMPENSATION AND BENEFITS (3). Study of tax concepts and retirement plan distributions. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

658. STATE AND LOCAL TAXATION (3). Study of state and local tax concepts and policies. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A grade of C or better in ACCY 644 or consent of the department.

659. TAX ACCOUNTING METHODS AND PERIODS (3). Study of timing and measurement of income and expense. A student must earn a grade of C or better in an income tax concepts course prior to enrollment. PRQ: A

grade of C or better in ACCY 644 or consent of the department.

Master of Accounting Science

Phase One

The College of Business has Phase One requirements that must be completed by each student. See Phase One Requirements listed under "Graduate Study in Business." College of Business Phase One courses must be completed before enrolling in Phase Two M.A.S. requirements. No Phase One course may be used to satisfy a Phase Two elective or requirement. The Director of Graduate Studies in Accountancy will determine which College of Business Phase One graduate courses will be included in each student's program of courses based upon successful completion of undergraduate course work.

The Phase One foundation courses The M.A.S. has Phase One requirements that will be included in a student’s program of study unless she or he has earned a C or better in corresponding undergraduate courses or a B or better in equivalent graduate courses elsewhere, or has passed the first and only attempt of the Phase One exemption examination. A student with a baccalaureate degree in accountancy and acceptable undergraduate grades may have already satisfied M.A.S. Phase One requirements. Courses completed for the Foundation of Accountancy certificate meet most of the M.A.S. Phase One accountancy requirements. Earning a Foundation of Accountancy certificate does not waive the admission criteria. The M.A.S. program director will determine which M.A.S. Phase One graduate courses will be included in each student’s program of courses. Phase One courses must be completed before enrolling in Phase Two M.A.S. requirements. Phase One courses may not be used as Phase Two electives or requirements. A student must have a C or better in each M.A.S. Phase One accountancy course. A student enrolled in M.A.S. Phase One courses may take Phase Two courses at the discretion of the Director of Graduate Studies in Accountancy provided the student has successfully completed all prerequisites for the Phase Two courses and has maintained a 3.00 GPA in M.A.S. Phase One courses. None of the required M.A.S. Phase One courses may be counted as accountancy electives in Phase Two. It is recommended that calculus be taken in addition to finite math (equivalent to MATH 210). The writing of a thesis is optional.

Required Accountancy Courses (M.A.S. Phase One Course Work):

ACCY 560 - Assurance Services (3)

The graduate Phase One requirements .... Accountancy certificate does not waive the admission criteria.

A student must have a .... order to register for any Phase Two course.

None of the required Phase One accountancy courses may be counted as accountancy electives in Phase Two.
The writing of a thesis is optional. It is recommended that calculus be taken in addition to finite math (equivalent to MATH 210).

Phase Two
Students are required to complete a minimum of 30 semester hours of course work beyond Phase One and the baccalaureate degree. The total Phase Two credits accepted in transfer from other institutions may not exceed 9 semester hours. ACCY courses numbered 600 or above and completed with a C or better in either the Certificate of Advanced Study in Accountancy or the Certificate of Advanced Study in Accounting Analytics meet Phase Two requirements; however, students must maintain a minimum average GPA of 3.00 in all graduate course work completed in Phase Two.

Other catalog change Page 60, 2018-19 Graduate Program

Professional Area of Study
The Professional area of study requires hours of course work.

Fifteen (15) semester hours in accounting courses
ACCY 633—Advanced Financial Reporting (3)

An additional fifteen (15) semester hours of elective course work approved by the department

Other catalog change Pages 60-61, 2018-19 Graduate Catalog

Master of Science in Taxation

Admission
Admission to the Master of Science in Taxation program is competitive. At a minimum, applicants must meet the admission requirements of the NIU Graduate School. An applicant is also required to have a baccalaureate degree or a master's degree from an accredited institution with at least 15 semester hours in accounting (including a course equivalent to ACCY 450) (including an income tax concepts course) or department approval (prior work experience will be given consideration); or a law degree (J.D.) from an institution accredited by the American Bar Association.

If applicants do not have a … scale) at the baccalaureate institution. These applicants must also present satisfactory scores on the GMAT or LSAT unless they have passed all parts of the CPA examination (applicants must attach appropriate documentation to their application materials).

Transfer Credit
The total semester hours accepted in transfer from accredited institutions may not exceed 9 semester hours.

Requirements
SECTION A – Recorded for inclusion in the 2019-20 Graduate Catalog

ACCY 644 - Advanced Taxation (3) (students who test out of ACCY 644 may substitute with an approved ACCY elective)
ACCY 645 - Professional Tax Research (3)
ACCY 647 - Corporate Taxation (3)
ACCY 649 - Partnership Taxation, Taxation of Flow-Through Entities (3)
ACCY 651 - Federal Estate and Gift Taxation (3)
ACCY 656 - Tax Concepts and Property Transactions (3)
ACCY 676 - Data Analytics and Decision Making in Taxation (3)

Course work from the following (45) (12)

ACCY 648 - Advanced Corporate Taxation (3)
ACCY 651 - Federal Estate and Gift Taxation (3)
ACCY 652 - Taxation of Estates and Trusts (3)

ACCY 661 - Advanced State and Local Taxation (3)

Master of Accountancy (15)
The Master of Accountancy certificate of graduate study in accountancy is designed to provide working professionals and non-accountancy graduate students with a set of courses focused on the foundational areas in the accountancy discipline. A certificate in The Foundation of Accountancy will enhance a student’s understanding of the role of accounting in business and other organizations. The courses partially fulfill the educational requirements to sit for the CPA examination and count towards completion of the M.A.S. Phase One accountancy courses for the Master of Accounting Science (see Master of Accounting Science admission requirements) and Master of Accountancy (see Master of Accountancy admission requirements) programs.

The certification program is a part-time cohort program with students admitted only in the fall semester.
minimum of three terms (including summer school) is required to complete the certificate. The admission criteria follow:

Students interested in the certificate should contact the certificate coordinator.

To successfully complete the certificate, students must complete all courses within six calendar years of starting.

Required courses
ACCY 510 - Accounting Information Systems (3)

Department of Finance

Course revisions Page 66, 2018-19 Graduate Catalog

560. FINANCIAL MARKETS AND INVESTMENTS (3). … … PRQ: FINA 607 FINA 500 and FINA 505, or consent of department.

575. FINANCIAL DATA ANALYSIS (3). Uses and limitations of financial data bases including CRSP, COMPUSTAT, DISCLOSURE, MorningStar, and various resources available through the Internet and the World Wide Web. Application of contemporary statistical methodology in analyzing this data for decision making purposes. PRQ: Consent of department.

Department of Marketing

New course Page 71, 2018-19 Graduate Catalog

CIP: 52.14

515. MARKETING METRICS AND STATISTICAL ANALYSIS TOOLS (2). Introduction to key marketing metrics and statistical analysis tools utilized in the development and implementation of marketing strategies. Provides students with a working knowledge of a wide variety of metrics utilized across all facets of marketing including finance/investment analysis, marketing planning, customer analysis, competitor analysis, etc. Basic marketing statistical analysis tools are introduced and applied to address marketing challenges in such areas as customer acquisition and retention, customer lifetime value, digital marketing communication, costs per conversion, and product/pricing assessment. Extensive use of real-life case studies and hands-on examples.

Department of Operations Management and Information Systems

CIP: 11.01

Course List (MSDA)
M.S. in Data Analytics (MSDA)

MSDA 628X. SUPPLY CHAIN BUSINESS ANALYTICS (3). Crosslisted as OMIS 628. Development and application of optimization methods to analyze supply chain issues. Covers linear programming, network optimization, integer programming, and nonlinear programming with an emphasis on model formulation, solution techniques, and interpretation of results.

MSDA 645X. APPLIED STATISTICS FOR BUSINESS ANALYTICS USING SAS (3). Crosslisted as OMIS 645. Comprehensive study of statistical methods in business analytics using SAS. Emphasis on the appropriate data analyses and interpretation of the results to assist business leaders in decision making.

MSDA 649X. BUSINESS COMPUTING ENVIRONMENT (3). Crosslisted as OMIS 649. Introduces students to the fundamentals of data management and analysis using SAS and R. Emphasis will be placed on the management of large distributed data sets and data manipulation, including reading, processing, recoding, and reformatting of data. Topics of this course include: advanced programming, using SQL with SAS and R, and optimizing SAS and R programs.

MSDA 652X. BUSINESS APPLICATIONS OF DATABASE MANAGEMENT SYSTEMS (3). Crosslisted as OMIS 652. Critical examination of the design, implementation, and management of database systems. Topics include the relational database model, entity-relationship modeling, normalization, the logical implementation of databases, transaction management, distributed databases,
object-oriented databases, client/server systems, data warehousing, database administration, and the use of databases in Website design. Laboratory experience with current database software. A student must earn a grade of C or better in an information systems concepts course prior to enrollment.

MSDA 661X. BUSINESS INTELLIGENCE APPLICATIONS AND TOOLS (3). Crosslisted as OMIS 661. Provides a foundation in the area of business intelligence (BI). Introduction to various BI technologies such as Microsoft SQL Server Management Studio, Analysis Services, Reporting Services, and/or SAP Business Objects to analyze enterprise data. Use of software tools to build an end-to-end BI solution. PRQ: MSDA 652X or consent of department.

MSDA 665X. BIG DATA ANALYTICS FOR BUSINESS (3). Crosslisted as OMIS 665. In-depth study of the concepts, methods, and tools for Data Science and Big Data Analytics with the focus on business scenarios. Topics include the Data Analytics Lifecycle, Basic Data Analytics Methods using the open-source RStudio, Advanced Analytics Theories and Methods including Clustering, Association Rules, Linear and Logistic Regression, Classification and Time Series Analysis, and Advanced Analytics Technology and Tools including the open-source software MapReduce and Hadoop. PRQ: MSDA 652X or Consent of department.

MSDA 673X. BUSINESS DATA VISUALIZATION (3). Crosslisted as OMIS 673. Visualization design and evaluation principles. Creating visualizations that effectively communicate the meaning behind data to people through visual perception. Comprehensive understanding of data visualization and the abilities to apply techniques for visualizing multivariate, text-based, temporal, geospatial, hierarchical, and network/graph-based data. Required use of SAS and R software. Application of related concepts and techniques in case studies to lead data-driven decisions in the real business world. PRQ: Consent of department.

MSDA 681X. ADVANCED PREDICTIVE DATA ANALYTICS FOR BUSINESS (3). Crosslisted as OMIS 681. Comprehensive study of advanced predictive modeling methods and tools used in business to predict future events or to discover meaningful patterns. Emphasis on formulating predictive analytics questions, determining the most appropriate predictive analytics methods and tools, and interpreting results and presenting data-driven solutions.

MSDA 683X BUSINESS APPLICATIONS OF TEXT MINING (3). Crosslisted as OMIS 683. Introduction to the power of large amounts of text data and the computational methods to find patterns in such large texts using R. Focus will be geared more towards the application of various text mining techniques to business problems, rather than on the intricacies of different algorithms.

MSDA 690X. INFORMATION TECHNOLOGY PROJECT MANAGEMENT (3). Crosslisted as OMIS 690. Application and integration of the project management body of knowledge areas to managing information technology projects. Focus on project management tools and techniques for defining and managing the project goal, scope, schedule, and budget. Other topics include quality management, risk management, and knowledge management as they relate to information technology projects. A student
must earn a grade of C or better in an information systems concepts course prior to enrollment.

New course

CIP: 52.13

663. ADVANCED BUSINESS APPLICATION DEVELOPMENT AND ANALYTICS USING SAP (3).
SAP is the global market leader in ERP software. Covers advanced topics in SAP ERP. Topics include customization of SAP ERP using ABAP and the use of SAP tools to carry out the data analytics lifecycle.
PRQ: OMIS 643.

Course revisions

OMIS 628. SUPPLY CHAIN BUSINESS ANALYTICS (3). Crosslisted as MSDA 628X.

New Courses

CIP Code: 42.2806

EPS 552. CLASSROOM MANAGEMENT FOR ADOLESCENT STUDENTS (3). Applications of motivation and management principles and procedures to maintain a positive learning environment in classrooms, focusing particularly on the developmental needs of adolescent students. Topics include building relationships with students, establishing classroom structures and expectations, managing and resolving conflict appropriately, responding effectively to student misbehavior, and effectively implementing a variety of instructional modalities. Intended for middle and secondary licensure.

EPS 560. MIND, BRAIN, AND EDUCATION (3). Neuro-cognitive bases of learning, memory, and motivation, and their implications for educational practice. Survey topics include basic neuroanatomy and an overview of neuroscience methodologies; evaluating claims of “brain-based” educational techniques;
genetic, cultural, and environmental influences on brain development and learning; the cognitive and neural substrates of reading, mathematical reasoning, and creativity; and the cognitive and neural substrates of learning disability and giftedness. For each topic, classroom implications will be considered.

Master of Science in Education in Educational Psychology

Admission

While a minimum GPA of 3.00 … not previously submitted.

University Honors students who graduate with a B.A. or B.S. in a related field are guaranteed admission into the M.S.Ed. program as space permits. University Honors student applicants will still need to complete an application including submission of letters of recommendation, goals statement, and CV/resume.

Doctor of Education in Educational Leadership and Policy Studies

Requirements

The doctoral program in educational leadership and policy studies requires a minimum of 63 semester hours of … Endorsement. The Educational Policy Studies specialization is designed for individuals who hold a master’s degree but do not hold or wish to pursue an Ed.S. degree but and are interested in doctoral-level analysis of educational issues, policies, and practices. Please note: neither specialization leads to Superintendent Endorsement.

Specialization in Educational Leadership

If the applicant holds an Ed.S. degree from NIU, the doctoral program requires 33 semester hours as follows:

Course work in …, sociocultural analyses of education (48)

Transfer credit from the Ed.S. degree or equivalent (6)

LEEA 799 - Doctoral Research and Dissertation (45)

If the applicant holds an Ed.S. degree from an institution other than NIU, the doctoral program requires 42 semester hours as follows:

Course work in research understandings and skills, learning and development theories, sociocultural analyses of education (24)
Electives approved by advisor or program coordinator (6)

Successful completion of candidacy exam

LEEA 799 - Doctoral Research and Dissertation (12)

Specialization in Educational Policy Studies

For students without an Ed.S. degree, the doctoral program requires 66 semester hours beyond the master’s degree as follows:

Course work constituting common requirements in research understandings and skills, learning and development theories, and sociocultural analyses of education (48-24)

↓

LEEA 799 - Doctoral Research and Dissertation (12)

Candidacy Exam

This examination requires demonstration of knowledge in educational leadership and policy studies. The exam process ensures a common standard is used in evaluating students for candidacy and to ensure all program candidates are able to demonstrate a broad body of educational leadership and policy studies content knowledge. The requirements and content matter covered on the exam are reinforced throughout course work, and special exam review sessions and practice exam opportunities are made available during students’ final semester of course work. A student must be in good academic standing, both overall and in the Ed.D. program to be eligible to take this examination. See program Student Handbook for further information. A student who fails this examination may, with the permission of the major department, repeat it no sooner than the following academic term. A student who fails this examination a second time, or is not granted approval for a second attempt, shall not be permitted to continue work toward the Ed.D. degree, and admission to that program shall be terminated.

Director of Special Education (20)

This certificate is designed for school leaders seeking the Director of Special Education endorsement on the Professional Educator License (PEL). It is available to students candidates who can document two full years of full-time special education teaching or service as a school social worker, school psychologist, school nurse, school counselor, or speech language pathologist with a valid PEL. Students Candidates must have attained a GPA of at least 3.20 in their most recent degree program. Individuals who do not have a master’s degree at
the start of the program must have completed a master’s degree and pass the appropriate content area test prior to recommendation for the Director of Special Education endorsement. Application materials for this certificate are available through the Department of Special and Early Education.

**New Courses**

CIP Code: 13.1099

SESE 686. PRACTICUM IN BEHAVIOR ANALYSIS (3). Supervised field experience in behavior analysis in schools, agencies, and other facilities. May be repeated to a maximum of 9 credit-semester hours. PRQ: Consent of department.

SESE 692. SEMINAR IN EVIDENCE-BASED PRACTICES IN SPECIAL EDUCATION: SINGLE CASE RESEARCH METHODS (3). In-depth analysis of critical issues and research supported practices in the field of special education. Consideration of major concepts underlying single-case research regarding individuals with disabilities. Serves as a capstone experience for candidates in the LBS1 master’s program. May be repeated up to 6 credit-semester hours. PRQ: SESE 603 and completion of 15 additional credit-semester hours in SEED course work, or consent of department.

SEVI 545. HOME MANAGEMENT FOR PERSONS WITH VISUAL IMPAIRMENTS AND MULTIPLE DISABILITIES (3). Study of adaptive techniques involved in teaching home management and related life skills to individuals who are visually impaired and/or multiply disabled. Emphasis on individuals who are transition-aged, vocational-aged, and seniors. Includes simulated visual impairments during completion of common home tasks. PRQ: Consent of department.

**Course Revisions**

SESE 552. ASSISTIVE TECHNOLOGY/MULTIPLE DISABILITIES (3). Evaluating abilities … programming augmentative communication devices and using other assistive technology devices. PRQ: SESE 564.

SEVI 585A. SUPERVISED FIELD EXPERIENCE: STUDENT TEACHING IN SPECIAL EDUCATION: VISUAL IMPAIRMENTS (9-12). Supervised student teaching of field experience working with children and adolescents with vision impairments in culturally and educationally diverse settings. All students candidates must satisfy the regulations governing the certification they are pursuing. student teaching. PRQ: Consent of department.

Course Revision

SESE 792. SEMINAR: SINGLE CASE RESEARCH METHODOLOGIES AND EVIDENCE-BASED PRACTICES FOR BEHAVIOR ANALYSTS IN SPECIAL EDUCATION (3). In-depth analysis of critical
issues and research supported practices in the field of special education. Consideration of major concepts underlying single-case research regarding individuals with disabilities. Includes analyzing the overview of single-case designs, data analysis, identification of variables, intervention planning, measurement systems, and parameters most critical in study of children and youth with special needs. Serves as a capstone experience for candidates in the BCBA Board Certified Behavior Analyst master’s program. May be repeated up to 6 credit hours. PRQ: SESE 603 or consent of department.

Master of Science in Education in Early Childhood Education

The major M.S.Ed. in early childhood education program offers focused study … Early Childhood Illinois Professional Educator License (PEL) requirements to teach children from birth through grade 2 in Illinois public schools. Candidates who meet the PEL requirements will be automatically eligible to receive the Gateways to Opportunity Level 5 Early Childhood Education (ECE) credential. Candidates may also elect to complete course work to fulfill early childhood special education approval requirements for teaching children with disabilities and special needs, birth through age six in pre-kindergarten. Advisers evaluate candidates’ prior course work, professional experience, and previous credentials to determine individual programs leading to PEL professional educator license with early childhood endorsement and/or early childhood special education approval, as well as the Gateways Level 5 ECE credential.

Non-Thesis Option

SEEC 504 - Developmentally Appropriate Practice in the Primary Classroom (3)
SEEC 510 - Preschool Movement in the United States (3),
OR SEEC 511 - Comparative/International Early Childhood Education (3)

Master of Science in Education in Special Education

Candidates seeking licensure must successfully complete the Illinois Licensure Testing System Test of Academic Proficiency (or state approved substitution) prior to no later than the semester prior to student teaching admission to the Teacher Education Program in special education and Candidates must also pass the tests required by their licensure field prior to student teaching. See also “Educator Licensure Information.”

Specialization in Advanced Special Education Practices
SECTION A – Recorded for inclusion in the 2019-20 Graduate Catalog

This specialization focuses on a program of study to strengthen the professional development of candidates who have a professional educator license with endorsement in special education. Candidates may choose from several options or develop a unique plan of study that meets their professional development needs.

Specialization in Visual Impairments

SEVI 586 - Topical Seminar in Teaching Students with Visual Impairments (3)
One graduate level course in research, such as: SESE 792 or ETR 520 or approved by adviser.
Elective course work with adviser’s approval
Candidates also may be required to complete prerequisite courses prior to enrolling in specific graduate courses.

Master of Science in Education in Special Education

Specialization in Visual Impairments
The specializations in Advanced … these programs.

The specializations in Learning … Visually Impaired. In some cases candidates working toward both the PEL and master’s degree may need to complete additional semester hours will be necessary to meet the requirements for both licensure and the master’s degree.

The specializations in Vision Rehabilitation Therapy and Orientation and Mobility are designed to serve individuals … …

Advisement

A candidate is assigned a graduate adviser when admitted to the program. The candidate also is assigned to a faculty mentor. Candidates are strongly encouraged to contact their faculty mentors early in their degree program. Courses of study are developed … … Graduate Catalog early in the program.

Doctor of Philosophy in Electrical Engineering

Elective Course Work (45)

Students must take an additional 45 semester hours of graduate course work as electives. This may include up to 27 extra dissertation hours in addition to the required dissertation hours. All elective courses must be approved by the Graduate Studies Committee, in consultation with the faculty adviser and the chair of the department. Students in the professional track need to take 3 semester hours of Industry Residency (ELE 701).

Certificates of Graduate Study

Digital Signal Processing (12)

Choose 4 from the following with at least one being at a 600 level

- ELE 551 - Digital Filter Design (3)
- ELE 552 - Real-Time Digital Signal Processing (3)
- ELE 559 - Signal Processing Detection Theory (3)
- ELE 650 - Digital Signal Processing Credits: (3)
- ELE 651 - Random Signal Processing Credits: (3)
- ELE 660 - Digital and Analog Communication Systems (3)

Doctor of Philosophy in Health Sciences
The college-wide Ph.D. program emphasizes an interprofessional orientation to research and practice, as students work with Graduate-graduate faculty members from across the college. The Ph.D. prepares students from a wide range of health and human sciences fields to function effectively as scholars and researchers within academic and practice settings. Doctoral students participate in shared learning across online seminars and research tools courses by making connections to health topics from the perspectives of multiple disciplines. Students complete an individualized program of study that is tailored to individual needs before taking the candidacy examination and conducting a dissertation under the supervision of a dissertation director(s). The residency requirement is fulfilled through limited face-to-face meetings for core program courses. Admission and course requirements are detailed under the School of Interdisciplinary Health Professions.

Admission

AHPT 611. FOUNDATIONS OF PHYSICAL THERAPY II (22). ....

AHPT 612. FOUNDATIONS OF PHYSICAL THERAPY III (32). Physical therapy management approaches and examination techniques. Topics include screening examinations, standardized assessments, transfer training, basic wheelchair fitting posture, balance, and gait assessments, and gait training using assistive devices. PRQ: Consent of school.

AHPT 614. FOUNDATIONS OF PHYSICAL THERAPY V (3). Development of skills in using decision-making models to examination, evaluation and create evidence-based prescriptive plans in the treatment of individuals with and without movement disorders. Related to soft tissue or other system dysfunction. PRQ: Consent of school.

AHPT 620. TOPICS IN CLINICAL EDUCATION (1). Introduction to the roles and responsibilities of healthcare professionals in various settings across the continuum of healthcare, including the process of clinical education. Course will include experiential engagement in professional and interdisciplinary collaboration in physical therapy. Students may repeat up to 2 credits. PRQ: Consent of school.

AHPT 639. EVALUATION AND TREATMENT OF MUSCULOSKELETAL DISORDERS (34). ....

AHPT 642. DIFFERENTIAL DIAGNOSIS IN PHYSICAL THERAPY (3). Exploration into screening, physical therapy diagnosis and medical management of patients with musculoskeletal disorders throughout the life span and in multiple clinical settings. Basic issues and concepts in human physiology, anatomy, pathology, and pharmacology will be reviewed in terms of applied able to evidence-based practice. PRQ: Consent of school.
AHPT 709. APPLIED RESEARCH METHODS IN PHYSICAL THERAPY I (1-2). Application of research concepts in the design of a clinical research study. **May be repeated up to 4 semester hours.** PRQ: Consent of school.

**Specialization in Speech-Language Pathology**

**Admission**

Admission to the specialization in speech-language pathology is limited to the summer term with an application deadline of January 1st. To be assured consideration for admission, prospective students must submit all required completed application materials through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) (application forms, official transcripts, GRE general test scores, and letters of recommendation) and to the Graduate School portals by the stated application deadline. NIU university honors students admitted via the freshman guaranteed admission program should check with the SLP program regarding entry requirements.

A typewritten statement describing the applicant’s qualifications, goals, and career aspirations as they relate to the speech-language pathology communicative disorders program at NIU.

**Documentation of 25 hours of supervised observation of speech-language pathology services.**

Final decisions regarding admissions are made by the program’s admission committee on the basis of a total profile of an applicant’s qualifications.

**Requirements**

**AHCD COMD 699** - Master’s Thesis (maximum of 3 semester hours) (1-3)

Students are required to complete the following practicum courses:

**Doctor of Audiology**

**Admission**

To be considered for admission to the Doctorate of Audiology (Au.D.) degree program, prospective students must submit completed application materials to the Graduate School no later than January 15 for fall admission. To be assured consideration for admission, prospective students must submit all required application materials through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) and the Graduate School portals. Admission to the Au.D. program is typically limited to the fall term, but exceptions may be considered in light of a review of deficiency course work.
Admission to the …

The Statement of Purpose is an integral part of the application. The statement should be no less than one page, but no more than two (2) pages. Students should use this opportunity to tell the admissions committee about their interests in audiology, as well as what makes them attractive candidates for the Au.D. program. Address their personal and professional goals. Three (3) letters …

Requirements
Students must complete a minimum of 112 semester hours from the following.

AUD 693- Externship in Audiology (218)

Special Clinical/Practicum Requirements
To be engaged in any clinical practicum experience…., absence of active tuberculosis, annual flu shot, and a negative criminal background check are required. Students must complete American Speech-Language-Hearing Association.

Doctor of Physical Therapy

proof of Hepatitis B, rubella, mumps, rubella, and varicella immunity
annual flu shot and TB tests

Admission
Admission to the D.P.T. is limited and competitive. To be assured consideration for admission to the D.P.T. program, prospective students must submit the all required documentation of clinical hours to Physical Therapy Centralized Application System (PTCAS) and the physical therapy program and all other completed application materials to the Graduate School application portals no later than October 15 for the following fall session. Interested students should view the PTCAS and D.P.T. admission website at http://www.chhs.niu.edu/pt/dpt/admission.asp. Admission to the professional physical therapy program is based on the following criteria:

Completion of a Bachelor’s degree from an accredited institution prior to matriculation
Completion of all prerequisite course work with a minimum 3.0 GPA prior to admission matriculation
Completion of a minimum of 50 hours of observation/volunteer/paid work in a physical therapy setting. These hours must be obtained at least two different settings within four years of the time of application.
Competitive scores on the GRE General Test
Professional essay
Letters of reference
SECTION A – Recorded for inclusion in the 2019-20 Graduate Catalog

An on-campus interview
A minimum 3.00 GPA (on a 4.00 scale) in the last 60 semester hours of undergraduate course work
A minimum 3.00 GPA (on a 4.00 scale) in the following prerequisite courses:

- A course in medical terminology

Doctor of Physical Therapy

Program Requirements

Students must complete a minimum of 107 semester hours from the following:

- AHPT 601 - Introduction to Physical Therapy Practice (2)
- AHPT 602 - Communication and Educational Skills for Physical Therapists (3)
- AHPT 603 - Psychosocial Aspects of Physical Therapy (3)
- AHPT 604 - Movement Systems in Physical Therapy (2)

Specialization in Leadership in Aging Studies (33)

Application Process
Two letters or recommendation ….

A declaration form for the specialization in leadership in aging studies. The PDF form can be found on the Human Development and Family Sciences website.

Specialization in Marriage and Family Therapy

The specialization in … human relationships. Through extensive course work, and clinical experience working with client couples, families, and individuals, and under the supervision by approved supervisors of the American Association for Marriage and Family Therapy (AAMFT), students in the specialization learn to integrate theory and research while developing the clinical skills of marriage and family therapists. The specialization prepares students to function in mental health, family service, hospital, business, and human social service settings, and upon graduation students have completed all requirements for associate membership in the American Association for Marriage and Family Therapy.

Upon graduation, students have completed all requirements for a state associate marriage and family therapy license and for association membership in AAMFT. SMFT students graduate with a Master of Science in Applied Human Development and Family Sciences with a Specialization in Marriage and Family Therapy. Additional information about the specialization may be found on the FACS website.

Application Process

The specialization in marriage and family therapy admits a limited number of students once a year with application review in the spring semester. Accepted applicants to begin the program in the following fall semester. The priority deadline for applications is January 15. Late applications will be considered if space is available. Applications for the Specialization in Marriage and Family Therapy are completed on-line through the Graduate School. The following documents are submitted to the Graduate School:

- Completed application
- Unofficial transcripts from all undergraduate and graduate institutions
- GRE Scores
- Statement of Purpose
- Three letters of recommendation
- Current resume/curriculum vita

Guidelines for the Statement of Purpose are provided on the website for applicants.

There are two … only if enrollment slots are available.
Admission

After a review of the applications, qualified candidates are invited to an interview day in February. Under extraordinary circumstances, faculty may conduct a long-distance interview with a candidate. Admission decisions are made following the interview process. Students are accepted into the graduate major in Applied Human Development and Family Sciences. Graduates of the program receive a Master of Science in Applied Human Development and Family Science with a Specialization in Marriage and Family Therapy.

Students admitted to this graduate major are required to have 9 undergraduate semester hours in human development and family sciences including a course in:
- Child or Lifespan Development
- Family Relations
- Family Theories or Child Development Theories (Upper Division)

Upon acceptance, the coordinator of Human Development and Family Sciences will notify candidates if there is a deficiency with the three required courses. Students are required to complete deficiency courses with a B or better by the end of their first semester in the SMFT Program. Failure to do so may result in removal from the program. Deficient courses may be taken at NIU or another institution.

An applicant is required to have a .... credit is not exceeded.

School of Interdisciplinary Health Professions

Faculty

Noel Ysasi, Ph.D., CRC, University of Texas Rio Grande Valley, assistant professor

NOTE: Faculty for the Ph.D. in Health Sciences include graduate faculty members from across the College of Health and Human Sciences.

The School of Interdisciplinary Health Professions offers the majors in Health Sciences at both the master’s and doctoral level, and Rehabilitation Counseling (M.S.) master’s program. The M.S. degree program in health sciences prepares students for leadership roles in health-related professions. Throughout this 30-semester-hour program, students learn about interdisciplinary communication skills, health-services quality measurement, culturally aware leadership and evidence-based analysis in order to effectively work in professional and academic environments. The Doctor of Philosophy in Health Sciences emphasizes an inter-professional orientation to research and practice. It seeks to educate students from a wide range of disciplines to teach, conduct research and practice in an ever more complex inter-professional world; it also seeks to respond to an increasing demand for faculty and practitioners who are prepared to function in fields grounded in information-driven, evidence-based practice. The rehabilitation counseling (M.S.) curriculum prepares students for careers … Certification (CRCC).

Master of Science in Rehabilitation Counseling
Grading Policies for Clinical Courses
Students must make … will be dismissed from the graduate program.

Doctor of Philosophy in Health Sciences
The college-wide Ph.D. program emphasizes an interprofessional orientation to research and practice as students work with faculty members from across the college. The Ph.D. prepares students from a wide range of health and human sciences fields to function effectively as scholars and researchers within academic and practice settings. Doctoral students participate in shared learning across online seminars and research tools courses by making connections to health topics from the perspectives of multiple disciplines. Students complete an individualized program of study that is tailored to individual needs before taking the candidacy examination and conducting a dissertation under the supervision of a dissertation director(s). The residency requirement is fulfilled through limited face-to-face meetings for core program courses.

Admission
A student seeking admission to the Ph.D. program must be admitted to the Graduate School, submit three letters of recommendation and a personal statement. Scores on the GRE are waived for applicants who have earned a graduate degree with a GPA of 3.50 or higher from an accredited institution.

Course Requirements
Completion of this degree requires a minimum of 45 semester hours of graduate course work at NIU beyond the graduate credits earned toward the student’s master’s degree.

Core Seminars (8)
- UHHS 710 - Scientific Underpinnings and Seminal Readings in the Health Sciences (3)
- UHHS 720 - Contemporary Health Science Topics (2)
- UHHS 760 - Knowledge Integration in the Health Sciences (3)

Research Tools Requirements (12)
- UHHS 730 - Research Design, Conduct, and Analysis in the Health Sciences I (3)
- UHHS 731 - Research Design, Conduct, and Analysis in the Health Sciences II (3)
- UHHS 740 - Data Analysis in the Health Sciences (3)
- UHHS 750 - Research Positioning and Grantsmanship Skills (3)

Individualized Program of Study (12)
All students are required to complete an individualized program of study related to their professional areas of interest. Proposed course work must be pre-approved by the student’s adviser. Additional course work may be required.

Additional Requirements
All students must complete a research ethics milestone prior to admission to the candidacy examination.
Students fulfill the requirement by demonstrating competency with ethical decision-making in the context of designing and implementing research for scientific and clinical communities. The research ethics training and assessment are available online.

**Candidacy Examination (1)**  
**UHHS 798 - Candidacy Examination (1)**

A student must receive approval from his or her graduate committee to take the candidacy examination. The candidacy examination is a written examination based on the core courses and the student’s individual program of study. Upon satisfactory completion of the candidacy examination the student is admitted to candidacy for the Ph.D. degree. The examining committee may allow a student who fails a candidacy exam to repeat it after a period of time determined by the committee. A student who fails the candidacy examination a second time or is not granted permission for a second attempt will not be permitted to continue work toward the doctorate and admission to the doctoral program is terminated.

**Doctoral Research and Dissertation (12)**  
**UHHS 799 - Doctoral Research and Dissertation (12)**

**Oral Defense of Dissertation**  
A final oral examination related to the dissertation is required and is conducted in accordance with the general requirements of the Graduate School.

Note: This is not a new program, it is being moved from the college section.

616. SPECIAL TOPICS CHEMISTRY SEMINAR (1). Both CHEM 615 and CHEM 616 are required of thesis option master’s and doctoral students each semester in residence except for summer session; they cannot be taken in the same semester. PRQ: Consent of department.

617. CANDIDACY (1). Preparation and defense of written and oral sections of the doctoral candidacy. Class taken only during terms when student is doing a doctoral candidacy examination. PRQ: Consent of department.

618. LITERATURE REVIEW (1). Preparation and presentation of comprehensive literature review on topic different from primary research area. Class must be taken within one year of successful completion of CHEM 617 examination. PRQ: CHEM 617 with a grade of B- or better.

691. SELECTED SKILLS IN CHEMISTRY AND BIOCHEMISTRY (1). Training in selected techniques in chemistry and biochemistry such as nuclear magnetic resonance, mass spectrometry, x-ray
Master of Science in Chemistry

Students who wish to enter the M.S. program should have a baccalaureate degree in a life, physical, or mathematical … …. These deficiencies must be satisfied with a grade of C or better during the first two semesters of enrollment in the program. University Honors students who graduate from Northern Illinois University with a baccalaureate degree in chemistry or a related area are guaranteed admission into the M.S. or Ph.D. program (with acceptable scores on entry tests for the latter) as space permits.

Prior to registration the student is required to take background examinations in the fields of analytical, inorganic, organic, and physical chemistry. These examinations are usually given a week before registration to aid the adviser in the preparation of a course of study for the student. A passing level has been established so that these examinations can also serve as proficiency examinations for required undergraduate courses. (Students will be informed in advance that undergraduate deficiencies may be satisfied in this manner.)

The background examination in general chemistry is required at the time of entering the program during the orientation weeks in January and August. All students must pass this exam with a normative score of 50% in order to hold a TA appointment in the department. Students failing to pass the exam must attend general chemistry lectures (CHEM 210 or CHEM 211) during their first semester, then retake the general chemistry examination at its next offering. Failure to pass the exam the second time will result in termination of the student's TA appointment.

The student must fulfill all requirements for the M.S. degree within five consecutive years from entry into the program.

Thesis Option
A minimum of 30 semester hours of graduate work is required. The student must successfully complete a minimum of five courses (15 semester hours, excluding CHEM 615, CHEM 690, CHEM 698, and CHEM 699), of which at least 9 semester hours are to be in chemistry, for graduate credit. At least one of these courses must be CHEM 644, CHEM 645, or CHEM 646, or an equivalent physical chemistry graduate course. A minimum of two courses must be outside the primary area of study, 14 semester hours, of which at least 12 must be from courses worth 3 or more credit-semester hours (acceptable courses include: CHEM 570 to 573; CHEM 600; CHEM 620 to CHEM 689). However, a student’s research adviser may require additional course work inside or outside the department course offerings. Other courses can be taken if approved by the Graduate Program Committee. The remaining course hours may be fulfilled from the departmental (CHEM 616, CHEM 691) and university (e.g., UNIV 600) “skills” courses. The Graduate Program Committee will have a final say if a particular university course will qualify as a “skills”
Only graduate courses from accredited institutions in which the student has earned a grade of B or better may be accepted towards an advanced degree, subject to approval of the department and the Graduate School.

CHEM 615, Chemistry Seminar, or CHEM 616, Special Topics Chemistry Seminar, must be taken each semester unless a written waiver is given by the Director of Graduate Studies. CHEM 690, Graduate Seminar, must be taken the first two semesters of enrollment.

**Essay Option**

A minimum of 36 semester hours of graduate work is required. The student must successfully complete a minimum of six courses for graduate credit (18 semester hours, excluding CHEM 615, CHEM 690, CHEM 698, CHEM 699, and CHEM 799), of which at least 12 semester hours are to be in chemistry. At least one of these courses must be CHEM 644, CHEM 645, or CHEM 646, or an equivalent physical chemistry graduate course. A minimum of two courses must be outside the primary area of study 15 semester hours, of which at least 12 hours must be from courses worth 3 or more credit hours. Acceptable courses include: CHEM 570 to 573; CHEM 600; CHEM 620 to CHEM 689. However, a student’s research adviser may require additional course work inside or outside the department course offerings. Other courses can be taken if approved by the Graduate Program Committee. The remaining course hours may be fulfilled from the departmental (CHEM 616, CHEM 691) and university (e.g., UNIV 600) “skills” courses. The Graduate Program Committee will have a final say if a particular university course will qualify as a “skills” course for the program. Only graduate courses from accredited institutions in which the student has earned a grade of B or better may be accepted towards an advanced degree, subject to approval of the department and the Graduate School.

CHEM 615, Chemistry Seminar, or CHEM 616, Special Topics Chemistry Seminar, must be taken each semester unless a written waiver is given by the Director of Graduate Studies. CHEM 690, Graduate Seminar, must be taken the first two semesters of enrollment.

Students earning an M.S. degree through the Essay Option must have passed the qualifying examination and the research oral (candidacy) examination described … ….
SECTION A – Recorded for inclusion in the 2019-20 Graduate Catalog

Educator Licensure Option
Students in this option … discipline coordinator. Retention in the program requires adherence to Graduate School and educator licensure requirements and regulations.

A minimum of 30 semester hours of graduate coursework work to be determined by the department is required. In most cases, the number of semester hours will exceed 30. In addition, the student must successfully complete a minimum of four courses worth a total of (12 semester hours) for a total of graduate credit from courses numbered CHEM 505 to CHEM 700, excluding CHEM 590 to CHEM 599, CHEM 615, CHEM 690, CHEM 698, and CHEM 699. At least one of the four courses must be CHEM 644, CHEM 645, or CHEM 646, or an equivalent physical chemistry graduate course. Acceptable courses include: CHEM 505 to CHEM 700, excluding CHEM 590-599, CHEM 615, CHEM 616, CHEM 690, CHEM 691, CHEM 698, and CHEM 699.

CHEM 690, Graduate Seminar, must be taken the first two semesters of enrollment.

The student must pass a comprehensive examination in chemistry and chemistry education. Only graduate courses from accredited institutions … …

The student must pass a comprehensive examination in chemistry and chemistry education.

A minimum of 30 semester hours of graduate work to be determined by the department is required. In most cases, the number of semester hours will exceed 30. Retention in the program requires adherence to Graduate School and educator licensure requirements and regulations.

Doctor of Philosophy in Chemistry

Master of Science in Chemistry

Educator Licensure Option

Industrial Chemistry Option

A minimum of 30 semester hours of graduate work is required. The course list must be approved by the faculty advisor. The student must successfully complete a minimum of five courses worth a total of 15 semester hours of graduate credit, of which at least 9 semester hours must be in chemistry. Acceptable courses include: CHEM 570-573; CHEM 600; CHEM 620 — 689). Many of these courses will be available online during the semesters when they are taught. The remaining course work may be done outside the department.
Only graduate courses from accredited institutions in which the student has earned a grade of B or better may be accepted towards an advanced degree, subject to approval of the department and the Graduate School.

A thesis incorporating the results of this research problem and successfully defended as part of a comprehensive oral examination is required. Research towards this thesis may be carried out at the place of industrial employment. In that case, a faculty co-adviser will be appointed. The co-adviser must approve a research problem and ensure a published product (peer-reviewed publication, patent application, or presentation as part of a national conference proceedings).

CHEM 698, Independent Study, should be taken as soon as possible, with enrollment to continue each term until enrollment in CHEM 699, Master’s Thesis, is begun.

Other Catalog Change Page 216, 2018-19 Graduate Catalog

Doctor of Philosophy in Chemistry

Students … …. These deficiencies must be satisfied with a grade of C or better during the first two semesters of enrollment in the program. University Honors students who graduate from Northern Illinois University with a baccalaureate degree in chemistry or a related area are guaranteed admission into the M.S. or Ph.D. program (with acceptable scores on entry tests for the latter) as space permits.

Course Requirements

Graduate students working for a doctoral degree must complete at least 90 the number of semester hours of graduate work beyond the baccalaureate degree required by the NIU Graduate School (currently 72) with a minimum GPA of 3.00. This will includes formal course work, independent study, research, and the dissertation, as specified on the student’s program of courses.

A minimum of …. (INSET).”

A minimum of 19 semester hours of graduate credit must be earned by successfully passing graduate-level courses. At least 15 of the 19 must be from courses worth 3 or more semester hours. At least 12 of the 19 must be from the core courses listed at the Department’s website. Suitable courses include the following: CHEM 570–573; CHEM 600; courses in the range CHEM 620–689, and CHEM 700. The remaining course hour requirement may be fulfilled from the departmental (CHEM 616, CHEM 691) and university (e.g., UNIV 600) “skills” courses, or by courses inside or outside the department course offerings as required by a student’s research adviser. Approval from the Graduate Program Committee is required for a student to earn credit for any such course work. Further requirements for the nanoscience specialization are given in the catalog under “Specialization in Nanoscience.”

Only graduate courses from accredited … the Graduate School.
CHEM 615, Chemistry Seminar, or CHEM 616, Special Topics Chemistry Seminar, must be taken each semester unless a written waiver is given by the Director of Graduate Studies. As part of CHEM 615 or CHEM 616, students must give an oral presentation of their research once a year. CHEM 690, Graduate Seminar, must be taken during the first two semesters of enrollment.

Within one year after successful completion of their candidacy exam, a student must give a seminar based on a comprehensive literature review of a topic different from their primary research area. This seminar will be the primary activity of CHEM 618 (1 semester hour). The seminar will be observed and evaluated by the members of the student’s candidacy examination committee. The candidacy examination committee chair will enter the student's grade for CHEM 618.

Examinations and Associated Committees

The background examinations are required at the time of entering the program (described above in the requirements for the master’s degree) in general chemistry is required at the time of entering the program during the orientation weeks in January and August. All students must pass this exam with a normative score of 50% in order to hold a TA appointment in the department. Students failing to pass the exam must attend general chemistry lectures (CHEM 210 or CHEM 211) during their first semester, then retake the general chemistry examination at its next offering. Failure to pass the exam the second time will result in termination of the student's TA appointment.

A written qualifying examination must be satisfactorily completed in the primary area. This examination will test comprehensive knowledge of the area at the graduate level. Faculty in each area will establish the graduate course(s) that will contribute towards the material upon which the examination is based. The examination will be based on three “core” graduate courses (the list is available in the department) that will contribute towards the examination material. If a student desires to substitute a single different graduate course for a core course for the examination, he or she must petition the Graduate Program Committee in writing. The qualifying examination must be taken no later than the first offering after completion of the fourth semester of enrollment as a graduate student. Students must have a GPA of at least 3.20 in previous graduate work to attempt the examination. A prospective doctoral candidate who has received an M.S. … …. Failure on the second attempt will terminate further work toward the doctorate but not the master’s M.S. degree.

Within one year of passing the qualifying examination in the primary field, the student must complete a research oral examination on his or her candidacy research exam on the student’s field of research encompassing the background literature in the area, the current state of the student’s research, and the proposed direction of the research. The candidacy examination committee, in consultation with the student and research advisor, will be formed from at least two faculty in addition to the student’s adviser(s) representing the primary area and a secondary area and will constitute the examining committee for all future examinations, with the addition of an extradepartmental representative for the final dissertation oral defense. The student’s research advisor will chair the research oral committee.
This examination will serve as the admission to candidacy examination. From the committee members, the Graduate Program Committee, in consultation with the research advisor(s), will select the examination committee chair, for which position the student’s adviser(s) are ineligible. The candidacy examination will consist of two parts. The written part will include a detailed survey of the background literature in the area, the current state of the student’s research, and the proposed direction of the research. This document must be at least thirty 30 pages in graduate school dissertation format and will serve as the foundation for the future thesis/dissertation. It must be given to the committee at least two weeks prior to the examination date. The oral part will include a 45-minute presentation by the student based on their current and future research followed by questions from the committee. The combined written/oral candidacy examination will have a designed course number, CHEM 617 (1 semester hour). The grade will be entered by the examination committee chair. A student who fails to pass this examination with a grade of B- or above must retake it no earlier than four nor later than six months after the first attempt. Failure on the second attempt will terminate further work toward the doctorate degree.

Each doctoral candidate will give an oral presentation of her or his research once a year. The student’s examining committee will evaluate the presentation and inform the student of its opinion in writing.

Within one year after successful completion of their candidacy exam, a student must give a seminar based on a comprehensive literature review of a topic different from their primary research area. This seminar will be the primary activity of CHEM 618 (1 semester hour). The seminar will be observed and evaluated by the members of the student’s candidacy examination committee. The candidacy examination committee chair will enter the student's grade for CHEM 618.

Following completion of the literature review, the student must form a Ph. D. examining committee incorporating the candidacy examination committee and additional members as may be required by department or Graduate School policy. The research director(s) shall act as the chair (co-chairs) of the Ph.D. examining committee. Each post-candidacy doctoral candidate must give an oral presentation of her or his research once a year. The student’s Ph.D. examining committee will evaluate the presentation and inform the student of its opinion in writing.

Appeals against dismissal for failure to … … The decision of the latter shall be final.

Specialization in Nanoscience

Students … the student’s transcript.

Since the Institute of Nanoscience, … departments.

Students interested in pursuing this … to be used for the specialization and the director of the INSET for additional information about this program.

This interdisciplinary Ph.D. … responsibilities.
Requirements for the Specialization in Nanoscience within the Ph.D. in Chemistry

A student can complete a specialization in nanoscience (nanochemistry) within the Ph.D. program in chemistry. A minimum of eight courses (24 semester hours, excluding CHEM 615, CHEM 690, CHEM 698, CHEM 699, and CHEM 799) must be taken for graduate credit of graduate credit must be earned by successfully passing graduate-level courses. At least 12 semester hours must be in chemistry.

Students must complete:

Core courses (9)
- CHEM 700G - Selected Topics in Chemistry: Nanoscience (1-3)
  Students must take 3 semester hours in this course.

Distribution requirements (6)
- PHYS 790A - Special Topics in Physics: Solid State Physics (3-6)
  Students must take 3 semester hours in this course.

The remaining 4 semester-hour requirement may be fulfilled from the departmental (CHEM 616, CHEM 691) and university (e.g., UNIV 600) “skills” courses, or by courses inside or outside the department course offerings as required by a student’s research adviser. Approval from the Graduate Program Committee is required for a student to earn credit for any such course work.

Department of Communication

Course Revision Page 222, 2018-19 Graduate Catalog

JOUR 652. SEMINAR IN MEDIA CONVERGENCE (3). Development, structure, Philosophy and theory of the intersection of media and technology in relation to the production, distribution, and consumption of content print, broadcast, online, journalism. Examination of how news media have changed and are changing, with focus on economic, political, and social systems the evolution of media in conjunction with the progression of technology and the individual, organizational, and societal implications. Advanced techniques for reporting, producing, and managing news for multiple platforms.

Department of Economics

New Course Page 232, 2018-19 Graduate Catalog

CIP: 45.0601

691. RESEARCH TOOLS FOR ECONOMISTS (3). Introduction for graduate students in economics to
the software applications, programing, and basic computational techniques needed to be productive researchers in economics.

**Course Revision**

Course 584X. FINANCIAL DERIVATIVES (3). Crosslisted with STAT 584. Review of financial derivatives including futures, European and American options, and exotic options. Greeks, trading and hedging strategies. Pricing derivative securities with appropriate boundary conditions, including Black-Scholes formula, binomial trees, lattice models and finite difference methods. Simulation and variance reduction techniques. Interest rate models. Covers the learning outcomes regarding financial models in the exam MFE of the Society of Actuaries (SOA), which is also the Exam 3F of the Casualty Actuarial Society (CAS). PRQ: STAT 583 or consent of department.

**Other Catalog Change**

**Master of Arts in Economics**

The M.A. program in economics requires a minimum of 30 semester hours of graduate credit. The core courses have the prerequisites of ECON 590 - Economic Statistics and Econometrics (3) and ECON 591 - Mathematical Methods for Economics (3). Students are highly encouraged to take those courses as part of their graduate studies regardless of their background.

**Course Requirements**

- ECON 690 - Econometrics I (3) A. Econometrics
- ECON 691 - Research Tools for Economists (3)
- ECON 692A - Methods in Economics: Econometrics (1-2)
- ECON 699A - Master’s Research Component: Master’s Thesis (1-6), OR ECON 699B - Master’s Research Component: Master’s Research Paper (3), OR a substantial research paper written in a 500- or 600-level economics course and approved by the professor teaching the course.

Students must choose at least 17 credit elective semester hours from courses numbered 500 or greater and only six of those 17 credits semester hours may be from outside the department with the approval of the Director of Graduate Studies.

Credits from ECON 590, ECON 591, and ECON 798 cannot be counted toward the 17 semester hours of electives.

Students with an interest in … field of study offered outside the department.

**Students with an interest in the Concentration in Financial Economics**
Students may earn a Concentration in Financial Economics by taking the following courses as part of their 17 hours of electives. They are expected to complete the following courses: ECON 584, ECON 740, ECON 742, ECON 791 and STAT 583.

- ECON 584 - Financial Derivatives (3)
- ECON 740 - Financial Economics I (3)
- ECON 743 - Financial Economics II (3)
- ECON 791 - Computational Economics (2)
- STAT 601 - Stochastic Processes II (3)

Comprehensive Examinations

Other Catalog Change

Graduate Catalog

Research-Tool Requirement

Joint M.S. in Applied Probability and Statistics

Students in good standing in the Ph.D. in Economics program may request approval by the Division of Statistics to also earn an M.S. in Applied Probability Statistics while they work toward their Ph.D. in Economics. These students must fulfill the requirements for the Econometrics field above in addition to the course work listed below and any thesis or comprehensive exam requirement within the Division of Statistics.

- STAT 515 - Statistical Computing (3)
- STAT 610 - Theory of Statistics I (3)
- STAT 611 - Theory of Statistics II (3)
- Two STAT courses 500 level or above (6)
- Two STAT courses 600 level or above (6)

Admission to Candidacy

Other Catalog Change

Page 229-230, 2018-19 Graduate Catalog

Doctor of Philosophy in Economics

Course Requirements

All doctoral students must satisfactorily complete a minimum of 60 semester hours of graduate course work, and no more than 12 credit-semester hours may be from 500-level courses. Among the required courses are ECON 648, Introduction to Game Theory (3), ECON 690, Econometrics I (3), … equivalents will normally be required
In addition, each student must take ... work in other applied fields may be obtained by consulting the department's director of graduate studies.

All doctoral students must earn at ... toward the Ph.D. from 500-level courses.

Prerequisites:
- ECON 590 - Economic Statistics and Econometrics (3)
- ECON 591 - Mathematical Methods for Economics (3)
- ECON 660 - Microeconomic Analysis I (3)
- ECON 661 - Macroeconomic Analysis I (3)

Core Courses:
- ECON 648 - Introduction to Game Theory (3)
- ECON 690 - Econometrics I (3)
- ECON 691 - Research Tools for Economics (3)
- ECON 692A - Methods in Economics: Econometrics (1)
- ECON 760 - Microeconomic Analysis II (3)
- ECON 761 - Macroeconomic Analysis II (3)
- ECON 796 - Research Seminar in Economics (3)
- ECON 797 - Current Research Colloquium (8)
- ECON 799 - Doctoral Dissertation Research and Dissertation (12)

Field Requirements
Student must complete two of the following fields:

Labor Economics
- ECON 700 - Labor Market Analysis I (3)
- ECON 701 - Labor Market Analysis II (3)

Financial Economics
- ECON 740 - Financial Economics I (3)
- ECON 242-743 - Financial Economics II (3)

Public Sector Economics
- ECON 750 - Public Sector Economics I (3)
- ECON 751 - Public Sector Economics II (3)

Econometrics
- ECON 790 - Econometrics II (3)
- ECON 793 - Financial and Time-Series Econometrics (3)
Course work in other applied fields may be obtained by consulting the department’s Director of Graduate Studies.

**Research-Tool Requirement**
The Department of Economics research-tool requirement is fulfilled by successfully completing ECON 590, ECON 591, ECON 690, ECON 691, and ECON 692A, which are required in the doctoral program.

**Admission to Candidacy**

After successfully … (ECON 796) to write a professional and original research paper in one of his or her fields of study under the guidance of a research adviser chosen by the student. This paper generally serves as a basis for the student’s dissertation. The paper will be evaluated by the research adviser and two additional faculty members approved by the research adviser, a committee of three faculty members. Upon receiving a satisfactory evaluation, the student will be admitted to candidacy. The Ph.D. research paper must be successfully evaluated within one year of the initial enrollment in ECON 796 and must be presented in the weekly research seminar (ECON 798) within one year after completing course work for the applied fields. The student must enroll in ECON 796 every semester until he or she has completed the Ph.D. Research Paper and the presentation in ECON 798. Failure to complete the Ph.D. Research Paper and Presentation within one year after the initial enrollment in ECON 796, completing the course work for the applied fields will result in dismissal from the doctoral program. Under exceptional circumstances, the student and their research adviser may submit a written request to the department’s Graduate Committee requesting an extension of this time limit; this time limit may be extended by the department’s Graduate Committee.

**Financial Engineering (15)**
Coordinator: Jeremy Groves, Director of Graduate Studies, Department of Economics

**Requirements (9)**
- STAT 583 - Stochastic Processes I (4)
- ECON 584X - Financial Derivatives (3)

OR
- STAT 584 - Financial Derivative for Actuaries (3)

- ECON 791 - Computational Economics (2)
- STAT 601 - Stochastic Processes (3)

(MATH 535 - Numerical Analysis may be substituted for ECON 791 with consent of department.)

**Electives (6)**

Department of English
New Course

CIP: 23.1303

General

704. PUBLICATION AND PROFESSIONALIZATION IN ENGLISH STUDIES (3). Experience in producing professional written work for submission to professional journals in the field of English. Professional development in English studies including presentation and networking skills, reviewing academic books, producing vitas, and negotiating the academic job market. PRQ: Must be currently enrolled in the Ph.D. program in English.

Areas of Study

Rhetoric and Professional Writing
ENGL 610 - Rhetoric of Prose Composition (3)
ENGL 625 - Methods of Research in Professional Writing (3)
ENGL 699 - Master's Thesis (3)
Course work from the following (9)
  ENGL 609 - Creative Writing (3)
  ENGL 624 - Professional Writing Institute (1-6)
  ENGL 626 - Technical Writing (3)
Two of the following (6)
  ENGL 631 - Topics in Professional Writing (3)
  ENGL 700 - Topics in the Teaching of College English (3)
  ENGL 703 - Seminar: Rhetorical Studies (3)
Electives (0-6 3-9)

Other Catalog Change

Master of Arts in English

The Department of English offers …requires 36 semester hours. All students pursuing the M.A. in English are required to take have the option of taking a final comprehensive examination or writing a thesis after completing a minimum of 24 semester hours in the Department of English.

Students pursuing the M.A. …; rhetoric and professional writing; ….
Doctor of Philosophy in English

A graduate faculty member, …. Full-time students should be able to complete all the requirements for the doctoral degree in five years beyond the baccalaureate degree or four years beyond the master’s degree.

Core Requirements (9–15)

Issues in Criticism (3):

ENGL 602D - Literary Theory and Criticism: Feminist Literary Theory and Criticism (3)
ENGL 603 - Traditions in Written Rhetoric (3)

History of the Language (3):

Rhetoric (3):
ENGL 603 - Traditions in Written Rhetoric (3)
ENGL 610 - Rhetoric of Prose Composition (3)
ENGL 630 - Theory and Research in Professional Writing (3)

Linguistics (3):
ENGL 615 - Descriptive English Linguistics (3)
ENGL 617 - Phonology (3)
ENGL 618 - Syntax (3)
ENGL 620 - Semantics (3)
ENGL 622 - Theories and Methods of Teaching English to Speakers of Other Languages (3)
ENGL 623 - Second Language Acquisition (3)
ENGL 633 - Pragmatics and Discourse (3)

Area of Specialization (12)
Courses to be determined by student in consultation with adviser.

Electives (3)
Electives could constitute a secondary area of specialization depending on the individual student’s interests.

British and American Literature (18)
At least one course from each of the following groups
Medieval:
ENGL 783 – Seminar: 20th Century American Literature (3)

Language, Linguistics, and Rhetoric (9)
At least one course from each of the following groups:

Language/Linguistics:
- ENGL 606 - Morphology (3)
- ENGL 703 - Seminar: Rhetorical Studies (3)

Foreign Language Requirement
- Dissertation

Candidates must write a dissertation that contributes to literary or linguistic knowledge of literature, linguistics, rhetoric, or English education, and exhibits original…

Department of Geographic and Atmospheric Sciences

Course Revision
- GEOG 556. FUNDAMENTALS OF MAPPING (3). For graduate students with little formal background in mapping. An introduction to mapping, with an emphasis on application in the geographic sciences. Concepts of maps as models, tools of visualization, and forms of graphic communication are introduced. Processes of map production, including imagery and surveying. Principles of map design.

Other Catalog Change
- Geographic Information Analysis (16-18)

- Course work from the following (16-18)

- GEOG 690 - Community Geography (3)

- GEOG 761 - Advanced Spatial Modeling and Regression Techniques (3)

- GEOG 771J - Independent Research: Methods and Techniques (1-3)

Department of History

Course Deletions

- HIST 513. FAMILY, SEXUALITY, AND SOCIETY SINCE 1400 (3).
- HIST 524. HABSBURG MONARCHY, 1815-1918 (3).
- HIST 526. EAST CENTRAL EUROPE, 1914-PRESENT (3).
- HIST 578. AMERICAN LEGAL HISTORY TO 1865 (3).
- HIST 579. AMERICAN LEGAL HISTORY SINCE 1865 (3).
- HIST 601. QUANTITATIVE METHODS FOR HISTORICAL SOCIAL ANALYSIS (3).
New Course

CIP: 54.0101

601. DIGITAL HISTORY (3). Introduction to digital history methods, tools, and practices such as text mining, data mining, data curation, document digitization, database construction, data visualization, digital mapping, and related digital approaches used to analyze historical societies and cultures.

Course Revision

Page 259, 2018-19 Graduate Catalog

HIST 518. MODERN EUROPEAN CULTURAL HISTORY (3). Intellectual foundations and cultural dimensions of European modernity. Subjects include the visual arts, literature, popular and mass culture, intellectual responses to violence, cultural representations of race and gender identity, with particular focus on the modern self, mass culture, consumer society, the avant-garde, and the intersection of culture and politics.

Course Revision

Page 260, 2018-19 Graduate Catalog

574. HISTORY OF IMMIGRATION IN THE UNITED STATES AND ETHNICITY (3). Survey of the nature and impact of immigration in United States American history from the colonial era to the present, focusing on ethnic group origins, persistence, modification, and interaction. Includes comparative analysis of European, Latino, and Asian immigration; law and policy; labor and economics; Examination of assimilation, acculturation, and accommodation theories; nativism and xenophobia; refugees and migrants; class, ethnicity, gender, and race; and immigrant communities and identities. Immigration legislation, multiculturalism, and minority relations.

CIP: 27.0502

STAT 511. MATHEMATICAL STATISTICS II (3). Principles of statistical hypothesis testing including the likelihood ratio test, uniformly most powerful tests and Bayesian testing techniques, theory of linear models including multiple linear regression and ANOVA. PRQ: STAT 510 or consent of division.

CIP: 27.0501

STAT 515. STATISTICAL COMPUTING (3). Theory and assessment of commonly used numerical methods in statistical research such as (a) numerical optimization: Newton-Raphson, quasi-Newton, and other methods; (b) numerical integration: adaptive methods, Gauss quadrature, Monte Carlo; (c) Monte Carlo simulation: algorithms and methods for non-standard probability distributions; (d) numerical linear
algebra: solving linear and non-linear systems of equations, SVD, Cholesky and other decompositions; (e) numerical roundoff and computer representation of numbers; (f) possibly numerical inversions of probability generating functions and Laplace transforms. PRQ: STAT 510, and either CSCI 230 or CSCI 240, or consent of the division.

STAT 517. APPLIED STATISTICAL LEARNING (3). Modern statistical methods for supervised and unsupervised learning with an emphasis on model assessment, selection, and regularization. Practical problems are solved using statistical software packages. A particular emphasis is placed on high dimensional problems. PRQ: STAT 510 or consent of division.

STAT 536. DESIGN AND ANALYSIS OF EXPERIMENTS (3). Design and analysis of single, multifactor, factorial, nested, and randomized block designs. PRQ: STAT 535 or consent of division.

STAT 537. CATEGORICAL DATA ANALYSIS (3). Contingency tables. Poisson, binomial, and multinomial regression techniques. PRQ: STAT 535 or consent of division.

STAT 610. THEORY OF STATISTICS I (3). Axiomatic foundations of probability, random variables and vectors, expectation, families of distributions, and transformations of random variables and vectors, convergence of distributions, convergence of random variables, derived distributions, distribution of the sample mean and variance. PRQ: STAT 500 or consent of the division.

STAT 611. THEORY OF STATISTICS II (3). Principles of data reduction, sufficiency, point estimation including method of moments, Bayesian and likelihood methods, evaluation of point estimators, developing and evaluating statistical hypothesis tests including likelihood ratio and Bayesian tests, interval estimation, asymptotic considerations. PRQ: STAT 610 or consent of the division.

STAT 617. STATISTICAL LEARNING (3). Supervised learning algorithms such as classification, regression, splines, lasso and other shrinkage methods, bootstrap, boosting, tree based methods and support vector machines, and unsupervised learning algorithms such as clustering and principal components analysis. PRQ: STAT 510 or STAT 537 or consent of division.

STAT 639. SURVIVAL ANALYSIS (3). Censoring, Kaplan-Meier estimator, log-rank tests, Cox proportional hazards and accelerated failure time regression models, diagnostics, competing risks and frailty models. PRQ: STAT 510 and STAT 535, or consent of division.

STAT 640. LONGITUDINAL DATA ANALYSIS (3). Repeated measure ANOVA and MANOVA, linear mixed models, generalized linear mixed models, generalized estimating equations. Possible additional topics include analysis of data from crossover designs, and statistical validation of questionnaires. PRQ: STAT 510 and STAT 535, or consent of division.

STAT 642. QUANTITATIVE RISK MANAGEMENT (3). Risk measures; statistical methods in extreme value theory; multivariate distributions and dependence; elliptical distributions and copulas; credit risk
modeling; operational risk and insurance analytics. PRQ: STAT 500 or consent of division.

STAT 644. GENERALIZED LINEAR MODELS (3). Topics on generalized linear models, such as the exponential family of distributions, maximum likelihood estimation and inference, normal linear models, logistic regression for binary outcomes, nominal and ordinal logistic models, and Poisson regression and log-linear models. PRQ: STAT 611 or consent of division.

Course Revisions Page 269, 2018-19 Graduate Catalog

STAT 570. INTRODUCTION TO PROBABILITY THEORY (3). Includes probability spaces, random variables, discrete, … … PRQ: MATH 232 and STAT 350, or consent of division. CRQ: MATH 240 or consent of division.

STAT 572. INTRODUCTION TO MATHEMATICAL STATISTICS I (3). Includes distributions of functions of random variables, laws of large numbers, central limit theorem, interval estimation, sufficiency, completeness, point estimation, and principles of Bayesian estimation, statistical hypotheses, analysis of variance, and the multivariate normal distribution. PRQ: STAT 400 or ACSC 400X, or STAT 500 or consent of division.

STAT 573. STATISTICAL METHODS AND MODELS I APPLIED REGRESSION ANALYSIS (3). A first course in statistical methods and models including exploratory data analysis and graphical techniques, and statistical methods for regression analysis, experimental design, and basic sampling techniques. Extensive use of statistical computer packages. Includes techniques for model selection, assessment of influential observations, and verification of model assumptions. PRQ: MATH 211 and STAT 301 or STAT 300, or STAT 500, or consent of division. CRQ: STAT 573A.

STAT 578. STATISTICAL METHODS APPLIED ANALYSIS OF TIME SERIES FORECASTING (3). Introduction to forecasting including use of regression in forecasting; removal and estimation of trend and seasonality; exponential smoothing; stochastic time series models; stochastic difference equations; autoregressive, moving average, and mixed models; model identification and estimation; diagnostic checking; and the use of time series models in forecasting. PRQ: STAT 573 or consent of division.

STAT 666. MODELS FOR DISCRETE MULTIVARIATE DATA ANALYSIS (3). A first course in the analysis … … Bayesian analysis of categorical data. In addition, multivariate version of Binomial and
Poisson distribution will be reviewed. PRQ: STAT 572 510 and STAT 574 537, or consent of division.

STAT 667. REliability AND life testing (3). Survival function, … … PRQ: STAT 572 510 and STAT 574, or consent of division.

STAT 670 600. Probability theory (3). Review of measures, measurable … … PRQ: MATH 630 and STAT 570 500, or consent of division.

STAT 671 601. Stochastic Processes II (3). Markov chains … …. PRQ: STAT 670 600 or consent of division.

STAT 673 643. Linear models … …. PRQ: STAT 572 and STAT 574, or consent of division. CRQ: STAT 611 or consent of division.

STAT 675 645. Multivariate Methods of Statistics (3). Introduction to the techniques … …. PRQ: STAT 510 572 or STAT 574, or consent of division.

STAT 676 646. distribution-free Non-parametric statistics (3). Survey of nonparametric statistical techniques and their logical foundations including the distributions of order statistics and ranks, distribution free statistics, tests of hypotheses, confidence intervals and Hodges-Lehmann estimators, for one sample, two sample, and paired sample location problems, the two-sample dispersion problem, analysis of one way and two way layouts, tests of independence, goodness-of-fit tests, linear rank statistics, and U-statistics. Asymptotic relative efficiency. Nonparametric density estimation and regression, kernel methods, bandwidth selection, roughness penalties. Nonparametric resampling methods, standard error estimation, bootstrap confidence intervals, bootstrap tests. Nonparametric observed confidence levels, PRQ: STAT 611 572 or STAT 574, or consent of division.

STAT 678 638. Time Series Analysis (3). Models for analysis … …. PRQ: STAT 510 572 and STAT 574, or consent of division.

STAT 680 625. Bayesian Statistics (3). Topics include Bayesian inference, loss function and risk, one parameter models and posterior inference, conjugate priors, non-informative priors, multi-parameter models, Bayesian computation, Gibbs sampling and Markov chain Monte Carlo methods and applications in different areas. Additional topics may include decision theory, theoretical and convergence properties of the Markov chain samplers, Bayesian model checking, selection and assessment criteria, Hierarchical models, Bayesian survival analysis. PRQ: STAT 510 572 and STAT 579, or consent of division.

STAT 691 695. Statistical Consulting (3). Content varies and involves participation in actual consulting projects. Topics may include statistical techniques commonly used in solving real life problems, model for problem formulation, given specific data and research questions, identification of parameters and solutions, client-consultant interaction techniques, ill-posed problems and their
SECTION A – Recorded for inclusion in the 2019-20 Graduate Catalog  

formulation; management of consulting time, facilities, and personnel. Participation under supervision in actual consulting projects. PRQ: STAT 574 or consent of division. CRQ: STAT 572.

STAT 693 697. GRADUATE READING IN PROBABILITY AND STATISTICS INDEPENDENT STUDY (1-9). May be repeated to a maximum of 9 semester hours. PRQ: Consent of division.
